impressing those who came in contact two.

That was the most thrilling experi-I hat was the most thrilling experi-ence of my life. I saw the wagons as soon as Gookin did, and made ready to jump off. I heard the click of the valve and felt the old engine immp as if she was trying to shake herself loose from the cars. The train held her to the iron or she surely would have left it.

"Gookin's eyes were fixed on the crossing. His countenance, except for the flash of his eye and the compression of his lips, was as immovable as if cut from stone. The train seemed to be flying. The horses were evidently ahead in the race to the crossing. match-box and carried it off in triumph the norses were evidently ahead in the race to the crossing. They would get there first, but would they get over? "On they came, running as horses wild with fright only can run, and on we sped as if trying to meet them, collide with and explode the wagon load of powder. Great Scott, how those horses did run! It had only issue a minute or two since. It had only been a minute or two since we first saw the wagons. It seemed like a lifetime. We had only run a mile or two, but it seemed as if we had run around the world. The space between the engine and wagon closed. They were apparently

at the crossing together. The second team was so close that its horses and wazon must be piled up on wreck of engine and cars in a second collision.

"As the feet of the horses of the leading team together the second collision. "As the feet of the horses of the leading team touched the track at the crossing I shut my eyes in horror to await the collision and the explosion which I was sure would follow. The train flew over the crossing in safety. The first team had beaten the engine and cleared the track. We had passed between the two wagons. I opened my eyes and looked back to note what had happened.

"The first team was massing toward the cents, of course !"

Grinder to Make Money.

An organ-grinder who has been working the city recently has a new scheme which Nathaniel W. Gookin was a man of is making his fortune, reports the Buffalo large stature. In manner he was quiet, Express Instead of the customary one always polite and obliging, but always monkey this enterprising worker carries When he stops at a saloon he with him with a consciousness of his re. doesn't bother with any of the customary serve and self-reliance, says the Wilming. tricks of climbing and begging. He sets ton News.

On one occasion, while running on the road, he was bringing a train from Philadelphia to this city. When he was nearing the grade crossing of the road leading to Dumont's price on the Name of the monkeys to fighting and then bets freely with the crowd as to which will win. His tets find plenty of takers and they was the probably be getting pennies, he now gets dollars, and it never occurs to the sports.

delphia to this city. When he was nearing the grade crossing of the road leading to Dumont's pier on the Delaware River, a few miles above this city, he saw two loaded powder wagons approaching the railroad. The foremost team had become unmanageable and was running away, followed by the second team.

Engineer Gookin calculated that he would meet one of those wagons at the crossing. There were no sir brakes in those days, and he could not stop in time to avoid a collision. If he slackened his speed he might avoid the first wagon to collide with the second one.

A collision meant an explosion, death to himself and fireman and the destruction of his train. There was but one chance of escape. That was to increase his speed, cutrun the horses and pass ahead of the first team, or perhaps between the two wagons. He accepted the issue quietly, threw his engine wide onen and waited.

A stranded fireman, who had begged a ride from Philadelphia to Wilmington on Gookin's engine that morning, told the story of that trip to the writer. He said:

''That was the most thrilling experi-

A recent German paper gives an sea count of a man who strayed into a " charity bazar" and had a trying experience.d He had made several unsatisfactor purchases, not knowing how to refuse the demands of the pretty saleswomen, and at last, to prove that he could make one sensible investment, he bought a small

match-box and carried it off in triumph and in haste.

Examining it after he had left the booth, he discovered that there was no place on which to light the matches.

So, with the air of one determined not to be cheated, he marched back to the young lady of whom he had bought the

box.

"There is a mistake here," he said.
"You sold me this pocket match-box, and there is no place on it to scratch the matches."
"My dear sir," said the young lady,
"you are quite right. I made a mistake.
That is intended for a jewel-box and costs 50 cents more if you please."

50 cents more, if you please."
"And what did you do?" asked a friend to whom he related his tale of woe.
"If you've ever been to a fair," replied the other, in an aggravated tone, "you know very well whit I did. I paid the 50 cants, of course."
